

Accounts Payable

Tracking obligations to suppliers, controlling cash flow, and making sound cash management decisions is simple and straightforward with TRAVERSE Accounts Payable. With this application you can prioritize your vendor payments and make wise decisions about when to make them. Optimize your cash flow disbursements by getting the information you need on which vendor offers the best discounts and who you buy from most frequently.

You can manage your expenses efficiently and keep your accounts up to date with user-defined terms, aging periods, and cutoff dates. Assess your financial position by producing timely reports. You'll save time and money with the ability to review outstanding payments by vendor and select which payments to hold or release. You can pay all invoices, or prepay or split invoices for payment.

Improve your efficiency with quick entry and defaults on headers. They allow you to set up fields and header screens so that you can skip over fields and default the values as you choose. You can view historical data for an unlimited number of years in detail or summary, and you can view and select payables to be released for payment.

Set up and maintain records for vendors you do business with.

- Pay vendors using your preferred method: cash, check, credit card, or electronic funds transfer (if using Banking application).
- Easily produce 1099 forms and magnetic media.
- Pay foreign vendors in either the vendor currency or company base currency, depending on their preference; gains and losses are calculated regardless of the payment currency.
- Customize grids by grouping, sorting, filtering, and modifying the layout to view the information the way you want to see it; your filter and grid layout is saved and used the next time you open the form.
- Void a payment to reverse all of the updates that were processed when the payment was originally posted; then process the payment again.
