

TRAVERSE & OSAS

Credit Card Processing

With customer's preferences evolving away from cash and check transactions, credit card payments are a staple for almost every business. Improve services and protect clients with fast and secure credit card processing options for use with your Open System's solution. We provide the tools to streamline your payments and maximize the features of your software. Together with our Certified Partners providing "industry best" solutions, we work to seamlessly integrate TRAVERSE or OSAS with payment processing software.

Convenience Your customers want to use credit/debit cards as payment for your company's goods and services - utilizing technology, eCommerce, and mobile devices. When you integrate TRAVERSE or OSAS with one of the turnkey credit card processing solutions, you'll get a fast and reliable partner to keep your vendors and customers happy. We provide a solution to make transactions faster and simpler.

Security The safety and security of sensitive information for both your company and your customers is of utmost importance. Keep customer information secure with a multi-pronged approach utilizing fraud-reducing EMV chip card processing, point-to-point encryption, tokenization and more – providing a PCI compliant solution that works for you. We offer secure and fraud-proof solutions that protect your clients, as well as your business.

Accuracy Partnering with a payment processing solution lets you get the transaction right the first time. Avoid chargebacks by reducing duplicate transaction input errors and risk of incorrectly entered amounts. With integration to TRAVERSE and OSAS, you can perform simple reconciliation and reduce your duplicate accounting efforts – saving your staff time.

Benefits of integrating credit card processing with TRAVERSE and OSAS

- Save time/staff expense by reducing need for duplicate entry
- Current and reliable reports of cash-flow
- Increased company financial visibility
- Elimination of human error due to manual entry
- Best practice utilization
- Workflow improvement
- Increased information/data security
- Quicker payment processing
- Greater customer satisfaction
- Reduced invoicing costs

Don't leave your company at a competitive disadvantage. Implement a reliable, secure, and fully-integrated solution from Open Systems to unite your credit card processing with your OSAS or TRAVERSE software.
